

Company Videos

Feature

Bringing learning to life—on demand, on screen, and on point

Companies can create and upload videos for internal use - and make these available to all staff who have access to the Epic platform. Examples include video's about the company for induction / onboarding processes, product training, launches, sales training etc.

Learning

Epic's **Company Videos** feature gives organisations a dynamic way to share knowledge, culture, and expertise—through custom video content that's accessible to all staff via the Epic platform. Whether it's onboarding, product launches, sales training, or internal updates, this feature turns passive viewing into active learning.

It's your in-house media channel—complete with subtitles, quizzes, and measurable engagement.

A set of questions (eg a multiple choice questionnaire) can be set up for staff to take a test that assesses their understanding and knowledge after watching the video.

Key Functions

- **Custom Video Uploads:** Share company-specific videos for induction, training, or announcements. From CEO messages to product walkthroughs, every clip is tailored to your team.
- **Multi-Language Subtitles:** Add subtitles in different languages to support global teams and inclusive learning.
- **Interactive Quizzes:** Attach multiple-choice questionnaires to each video to test understanding and reinforce key messages. Results can be tracked for compliance or development purposes.
- **Accessible to All Staff:** Videos are available to anyone with Epic access—making it easy to scale training and communication across departments and locations.
- **Mobile App Enabled:** Watch, learn, and complete quizzes on the go—perfect for field teams, remote workers, or onboarding from anywhere.
