

# Company Poll

## Scenario

### ABC Suites (Pty) Ltd

Seek first to understand, then to be understood”

- Stephen Covey

#### The Challenge:

Candy Wrapper, CEO of ABC Suites, was in full swing planning the company's next teambuilding event. The venue was ready to book, but the available dates had changed—and she needed a majority vote from staff, fast. Rounding everyone up or sending a traditional survey would take too long. She needed instant input, from everyone, today.

With time ticking and inboxes overflowing, Candy knew a regular email wouldn't cut it. She needed something bold, visible, and impossible to ignore.

#### How ABC Suites uses epic:

Epic's **Company Poll** feature came to the rescue. Within minutes, Candy launched a quick poll asking staff to choose between two dates. The question popped up on every user's home screen—bright, flashing, and impossible to miss.

Staff clicked, voted, and submitted their answers in seconds. No login hurdles, no email clutter. Candy closed the poll and received a live report instantly—majority vote confirmed, venue booked, crisis averted.

The Company Poll feature became Candy's go-to tool for fast decisions, team input, and spontaneous engagement. Whether choosing a lunch theme, voting on a charity partner, or gathering feedback on a new initiative, ABC Suites now had a way to ask and answer—without delay.

***“From inbox chaos to instant clarity—Epic's Company Poll gave ABC Suites the power to decide together, faster.”***
