Feature

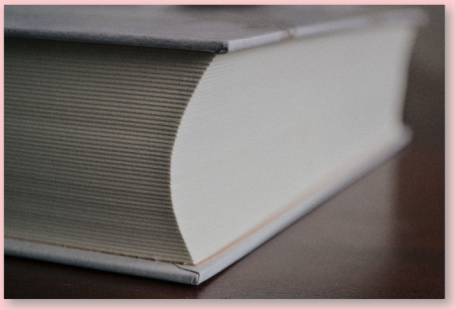

Everyone sees the plan.

Your whole strategy on one page, so every team knows the priorities and who owns them.

The Problem

Strategic planning gets buried in complexity: long presentations, drawn-out debates and a 20-page document that's rarely revisited.

Teams can't connect daily decisions to the strategy, ownership is unclear and progress isn't tracked, so the strategy becomes a static document instead of a living guide.

What Changes

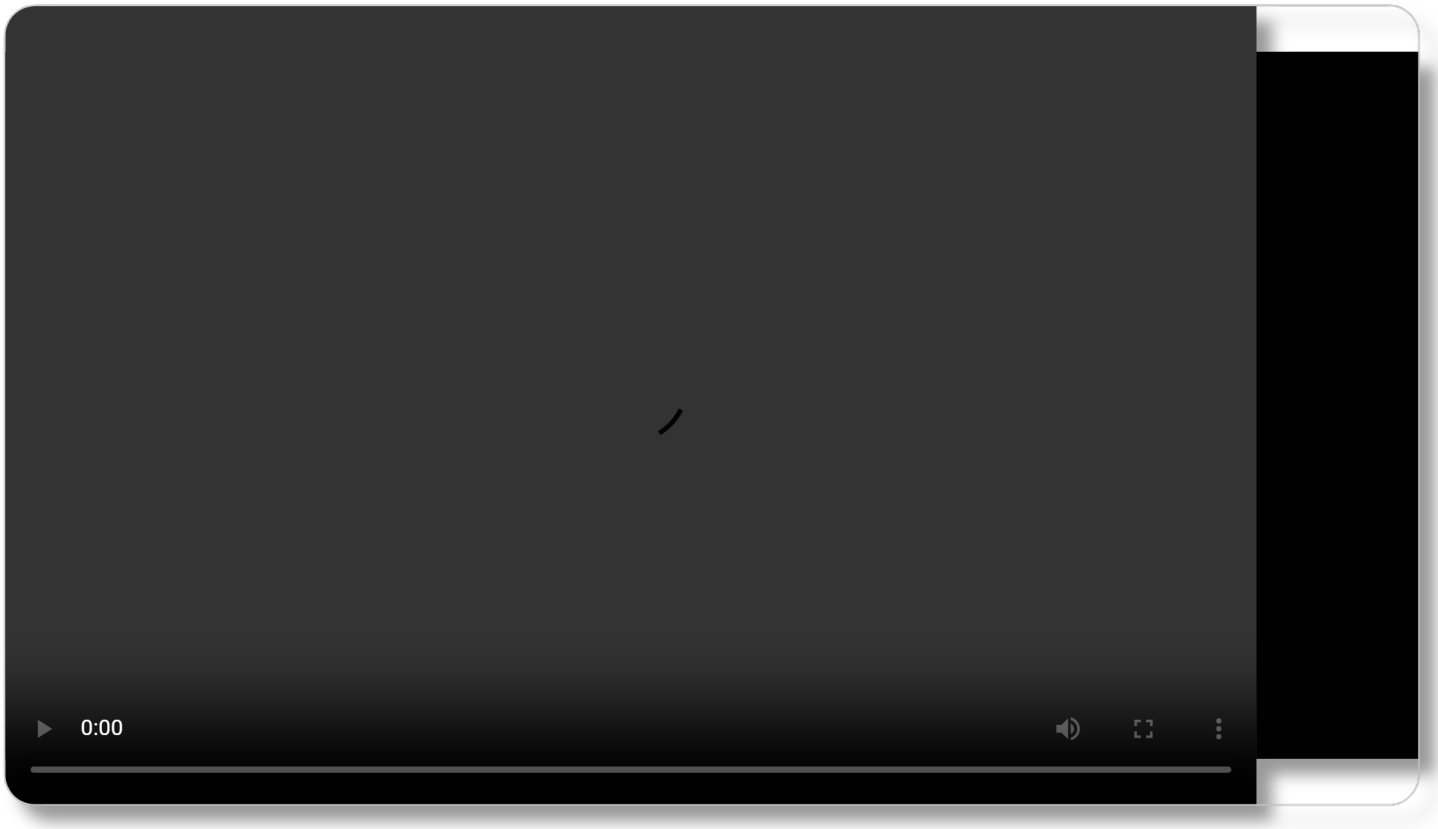

- **The whole strategy on one page everyone can read**
- **Every objective has a named owner**
- **Leaders see progress live, not once a year**

How it works

What you get	How Epic does it
Five essential elements	Vision, Values, Strategic Pillars, Strategic Objectives and KPIs – using your own naming
KPI suggestions	Epic CoPilot can suggest relevant KPIs for each strategic objective
One click to share	Download your Strategy on a Page (Epic Model™) instantly, and update it as needed
Department alignment	Business units build their own One Pagers, linked to company Vision and Values
Ownership and accountability	Owners update percentage progress, RAG status and progress statements
Leadership line of sight	Updates feed the Strategic Report and Dashboard

"From static plans to strategic momentum."
