Staff Card

Scenario
ABC Suites (Pty) Ltd

Nobody could say for sure who was on site, or when they arrived.

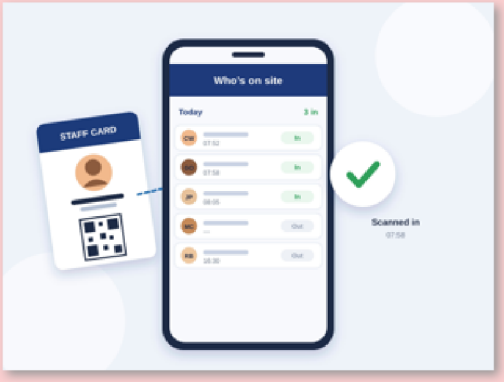

ABC Suites (Pty) Ltd · Gary Okey, Operations Manager.

The Challenge

At ABC Suites, arrival and departure times were recorded manually or not at all.

Managers relied on memory, informal check-ins or paper logs across multiple sites, and HR struggled to verify timekeeping for audits, payroll and compliance.

Operations Manager Gary Okey wanted something simple, secure and scalable – without expensive hardware or a complex setup.

What they did

1. **Gave everyone a QR-coded card.** Each staff member received a personalised access card with a unique QR code.

2. **Scanned with a phone.** On arrival and departure, staff scan their card with a mobile phone or scanner, and every scan is time-stamped and stored securely.

3. **Put attendance on a live dashboard.** Gary sees who's in, who's out and when they arrived; HR gets a reliable audit trail for payroll and reporting.

The Result

Attendance tracked with precision, across every site

A smarter, smoother start to every workday at ABC Suites. Scan history supports shift planning, safety checks and compliance reviews – and visibility is just a tap away.

"From manual logs to mobile clarity."
